Flowers for the Sick.

"Daisy Eyebright," the lively correspondent of the Country Gentlemen, and the wife of a physician, writes:

"It would be selfish in us to cultivate flowers merely to adorn our own homes, or to gratify our own love of the beautiful. The flewers are generous, their fragrance is not pent up in themselves, but it is wafted on over the tiny current of air, and is shared by every one who passes by our grounds, or enters our parlors; and we doubt not that many wistful eyes admire the bright colorings and desire to hold some of them in their hands as their very own. It is a sad thing to be sick and disabled from walking out. It is a great privation to be shut up in the house, a feeble, wasting invalid, when there is so much brightness out of doors, so much to fill the heart and eye with joy and happiness. We that rise early and employ ourselves with daily cares and labors, can hardly sympathize with those who are unable to enjoy these privileges, which we can really never appreciate until they are lost and gone beyond our recall. And in every community there are those who highly prize the "green things of the earth" and yet are not able to enjoy them, but are forced to struggle for life with pain and sickness day and night. To such sufferers a fragrant bunch of flowers comes like a messenger of hope and comfort from the other world—even a simple rosebud or a bunch of pansles is fraught with a blessing, and such slight tokens of remembrance will brighten many a dark hour, and give a cheerful appearance to many a gloomy room. Far better than pills or powders, sometimes, are the bright, sweet flowers of our gardens to those who are denied many comforts; and even when their illaess is so severe that only the physician and nurse can enter their sick room, the lovely, fragrant flowers will remind our friends that we are mindful of their sufferings, and will do all in our power to alleviate them. Amid the dull array of philas of medicine, it is almost a blessed relief to see a few flowers, which can cheer the patient in his b

Fire insurance is regarded everywhere as among the necessaries of life. A property-holder is reckless without it. Life Insurance is now classed with fire insurance in this particular. The National Life Insurance (Company of the United States of America, with Branch Office at Philadelphia (with which correspondence should be had), with the largest cash capital of any life insurance company in the world, offers insurance in all sections of the country at three fourths the customary rates, and desires an agent in every locality. It combines absolute strength with unusual cheapness, is managed by with unusual cheapness, is managed by some of the best men of the country, and is well worthy the patronage of all per-sons seeking insurance, and the attention of all persons seeking employment.

JOHANN STRAUSS, the famous composer of Waltzes, who came over to the Boston Jubilee last year, has written a note to the Mason & Hamlin Organ Co., in which he says that their instruments richly deserve their great reputation; and that he knows no other instruments of the class in this country or Europe, at all comparable to them.

CONSUMPTION.—For the cure of this distressing disease there has been no medicine yet discovered that can show more evidence of real merit than Allen's Lung Balsam. This unequaled expectorant for curing consumption, and all diseases leading to it, such as affections of the throat, lungs, and all diseases of the pulmonary organs, is introduced to the suffering public after its merits for the cure of such diseases have been fully tested by the medical faculty. The Balsam is sonsequently, recommended by physicians who have become acquainted with its great suc-

THE SERPTICAL CONVINCED.—Every advance in Medicine, every new remedy has encountered an opposition, which is the test of truth. Galen and Jenner only were believed when they had proved their discoveries against opposition. But men are observing, and benefits always make believers. No incredulity can stand the silent argument of good feaults. When Dr. Walker proclaimed that he had produced from the medicinal herbs of California an Elixir that would regenerate the sinking system and cure diseases not organic, the incredulous shook their heads. Yet his Vinegar Bitters is now the Standard Restorative of the Western World. The truth could not be resisted. Under the operation of the new remedy, Dyspeptics regained their health, appetite and strength, the Bilious and Constipated were relieved of every distressing symptom; the Consumptive and Rheumatic rapidly recovered; Intermittent and Remittent Fevers were broken up; the taint of Scrofula was cradicated! Who could gainsay facts like these? Not even the Faculty. Skepticism was routed. All doubts as to the claims of the Bitters to the first place in the first rank of modern medicines were silenced, and this wonderful preparation is to day the most popular Tonic, Alterative, and Blood Depurent ever advertised in America. In common with other journalists, we are free to add our testimony to this remedy. It is a domestic medicine, and no household should be without it. should be without it.

should be without it.

OME form of Catarrh begins with uneasiness of nose; the nose is obstructed by the thickened lining membrane and feels dry, a desire to pick it, bleeds a little, sores soon start, spread and get deeper, crusts form on them, large and hard to get away, matter discharges, fiesh is eaten and the bone decays, breath very offensive and face becomes disfigured. Terrible disease! Nothing will cure but Dr. Pierce's Golden Medical Discovery, taken earnestly to correct the blood and system; locally, use Dr. Sago's Catarrh Remedy, a healing specific, and to apply it properly, Dr. Pierce's Nasal Douche. This reaches all the diseased parts. All these sure means of cure sold together for \$2 by Druggists.

GODEY'S LADY'S BOOK.—The July number begins the forty-fourth year of the magasine, and it is an excellent number, both in literature and illustrations. "On the Stille" is a beautiful steel-plate, well designed and elegantly finished. "Bridal Wreaths" printed in blue, an extra embellishment, that will be of service to our lady friends in arranging this necessary adorament. "Gathering Wild Flowers" is another pretty plate. And there is also a beautiful colored fashion-plate, an extension sheet of fashions of the latest style, and a work department of various designs. Marion Harland's story of "Carrying Weight" is continued. Several short stories are also given, and many valuable hints will be found in the several houshold departments. The publisher still announces a handsome chromo for each subscriber for 18.3, whether a single subscriber for \$3, or a club of eix for \$14. Published by L. A. Godey, Philadelphia, Pa. Mental Depression.

Mental depression is a disease of the nervous system, and, of all the ills fiesh is heir to, it is the one that excites the least sympathy. It is a subject of frequent jects, and is called by various derisive terms ; but, although it is often laughed at, it is not easy to laugh the patient out of the belief that his ills are all real, for it is a real disorderthe general features of which are constant fear. anxiety and gloom. The external senses, as well as the mental faculties, often manifest symptoms of derangement. Noise, as of falling water, and ringing in the cars are complained of, while black specks and flery sparks frequently fits before the vision. Admonitions like these should not be disregarded, as they may, if neglected, terminate in insanity. The seat of the disease is in the brain and nervous system, and to control the malady it is necessary to use a powerful tonic and alterative. which will correct and tone those organs without isflaming the brain. This is the secret of the success of Hostetter's Stomach Bitters in cases of this kind, for which it is the safest as well as the best of restoratives. In fact it is the only pure and reliable tonic stimulant known. Many nostrums, purporting to be tenics, are puffed up from time to time in the newspapers, but the sufferer had better let them alone. Hostetter's Stomach Bitters has proven itself, by many years' trial, to be in every respect what it is represented to be.

Dr. J. Walker's California Vin-egar Bitters are a purely Vegetable preparation, made chiefly from the na-tive herbs found on the lower ranges of the Sierra Nevada mountains of California, the medicinal properties of which are extracted therefrom without the use of Alcohol. The question is almost daily asked. "What is the cause of the unparalleled success of VINEGAR BITTERS?" Our answer is, that they remove the cause of disease, and the patient recovers his health. They are the great blood purifier and a life-giving principle, a perfect Renovator and Invigorator of the system. Never before in the history of the world has a medicine been compounded possessing the remarkable qualities of VINEGAR BITTERS in healing the sick of every disease man is heir to. In their treatment, a purgative, exerting a powerful influence upon these various organs, is essentially necessary. There is no cathartic for the purpose equal to DR. J.
